

### Leather soles

The leather soles are manufactured according to customer's wishes and their umriss. The thickness of the leather is 3, 4 or 5 mm with several color options. The heels can be made of leather or artificial material(masonite). Frames can be chosen from rubber, leather or artificial material (salpa), in many colors, widths and heights. We are at your service to find suitable options. The minimum order quantity is 500 pairs / model / color. Below you can find examples of the soles to be delivered.
